APPLICATIONS TO QUOTE

Leave a row blank if it is not on this job

	APPLICATION	DIA.	SDR / DR	FOOTAGE	COLOR / STRIPE	FITTINGS
☐	FM fire main and site loop					
☐	Hydrant leads and riser lead-in					
☐	Conduit — medium-voltage power					
☐	Conduit — fiber, telecom, BMS					
☐	Conduit — spare ducts, next hall					
☐	Buried chilled-water supply					
☐	Buried chilled-water return					
☐	Condenser water / tower run					
☐	Makeup, process, or potable					
☐	Glycol / heat-rejection loop					
☐	Storm, sanitary, or raw intake					
☐	Custom fittings only					
☐	Other					

FM pipe and conduit are separate products. Do not use a conduit SDR on a fire main or a pressure DR on a duct bank.

JOINING, LISTINGS, AND DELIVERY

JOINING

- [ ] Butt fusion, ASTM F2620
- [ ] Electrofusion
- [ ] Mechanical couplings
- [ ] Flange adapters at equipment

LISTINGS REQUIRED

- [ ] FM 1613 fire service
- [ ] NSF/ANSI 61 potable
- [ ] ASTM F714 / D3035 pipe
- [ ] ASTM F2160 conduit
- [ ] AWWA C901 / C906
- [ ] Red or orange stripe

PROJECT CONDITIONS

DESIGN PRESSURE, PSI	FLUID · WATER OR % GLYCOL	BURIAL · OPEN CUT OR HDD	PRE-INSULATED? Y / N

SEND WITH THIS SHEET

- Plan sheets or a takeoff with diameter, wall, and footage
- Fitting list, or mark fittings in the column on page 1
- Fire-flow and residual pressure if the FM main is in the quote
- Duct-bank section if conduit shares a trench with fire or chilled water
- Delivery window and any laydown limits on site

NOTES

Spec section, alternate diameters, phasing, or anything the takeoff does not show.

WHAT YOU GET BACK

A priced schedule by application: FM pipe, conduit, and pressure pipe kept separate, with fittings called out. Diameters 2" to 65". Custom elbows, tees, reducers, and caps fabricated to the drawings. Drop-ship to the site. Questions go to Trent McNally, U.S. Sales — trent@pcpipellc.com or 361-362-9033.
